Recent Computer Science graduate with hands-on experience building deep learning systems, fraud detection models, and full-stack web applications using Python, Flask, and React.js. Proficient in backend development, REST API integration, and machine learning workflows. Seeking opportunities to contribute to scalable Python and ML/AI-powered applications.

Technical Skills

Languages: Python, JavaScript, SQL

Backend: Flask, FastAPI, Django, Node.js, REST API Design

Frontend: React.js, HTML5, CSS3, Tailwind CSS

ML & AI: TensorFlow, scikit-learn, OpenCV, Computer Vision, Pandas, NumPy

Databases: PostgreSQL, MySQL, MongoDB

DevOps & Tools: Docker, Git, GitHub Actions, CI/CD, Linux

Projects

Fraud Detection in UPI Transactions

Python · CNN · scikit-learn · Flask · REST API

- Developed a fraud detection system trained on a 10,000+ record financial dataset using CNN and ensemble learning techniques to classify UPI transactions as fraudulent or legitimate.
- Performed data preprocessing and feature engineering on transaction attributes including customer details, location data, and transaction amount patterns to improve model prediction performance.
- Deployed the trained model as a Flask REST API enabling real-time fraud prediction through user-provided transaction inputs and JSON-based responses.

Face Swap Application

Python · InsightFace · OpenCV · TensorFlow · Deep Learning

- Built a face swap application using Python, InsightFace, and OpenCV that generates realistic swapped face outputs using deep learning-based facial detection and alignment.
- Implemented a multi-stage pipeline covering facial landmark detection, face alignment, and image blending to produce natural-looking face replacement results on standard hardware.
- Designed a user interface to support multiple image inputs, enabling batch face swapping with improved detection accuracy across varied facial images.

Experience

Web Development & Data Science Intern · Contriver

Bengaluru, Karnataka · Feb 2025 – May 2025

- Developed web application components and managed structured databases using Python, SQL, and WordPress under industry mentorship in a software development environment.
- Analyzed real-world business datasets using Python libraries to extract insights and support data-driven decision making.

Cyber Security Intern · IBM SkillsBuild (AICTE & Edunet)

Remote · Oct 2023 – Nov 2023

- Applied steganography, encryption, and access control mechanisms to protect sensitive data following CIA Triad principles.
- Analyzed system vulnerabilities and implemented secure coding practices across lab modules and security assessments.

Education

B.E. in Computer Science & Engineering · JNNCE, VTU

Shivamogga · 2021 – 2025

- CGPA: 7.9/10.0

Certifications

- Career Essentials in Data Analysis — Microsoft & LinkedIn Learning
- DevOps Fundamentals — freeCodeCamp
- Software Development Fundamentals — Udemy
